QUICK START GUIDE

PanaCast® ePTZ App (Mac OS X)

This document describes how to set up and run the PanaCast® ePTZ (Pan, Tilt, Zoom) app with 3rd party collaboration applications on a Mac. This virtual camera app enables local control of digital pan, tilt and zoom within the video stream of a PanaCast 2 camera connected to the PC handling the web conference connection. It helps remote participants have an even more detailed and richer collaboration experience. It works with Skype®, Skype® for Business, Cisco WebEx®, Citrix® GoToMeeting®, Zoom, Google® Hangouts® and more.

Mac OS X

Requirements

Mac OS X 10.1 or later

Instructions

Step 0: Download and Install PanaCast ePTZ App

Download the PanaCast ePTZ app from: getpanacast.com/download

Step 1: Enabling PanaCast ePTZ App

- Make sure your PanaCast 2 camera is connected to a fully powered USB 3.0 port and powered on (if not use the power adapter included)
- Go to the Video Settings of your collaboration app
- Select "PanaCast ePTZ" as your webcam in the drop down menu
- The PanaCast ePTZ is auto-launched on selection

Step 2: Using PanaCast ePTZ

- PanaCast ePTZ runs alongside 3rd party video collaboration applications and is used to manipulate the panoramic video stream of a PanaCast 2 camera connected to the PC handling the web conference connection (Figure 1)
- Click on the PanaCast ePTZ app in the menulet and hold down the ALT key to perform pan, tilt, and zoom functions
- To exit the app, deselect the camera as your active webcam and the app will automatically shut down on its own

Step 3: Using Pan, Tilt and Zoom Gestures

Standard multi-touch gestures allow you to easily manipulate the video while in a PanaCast session. For example, Figure 2 shows the PanaCast 2 video stream zoomed into the whiteboard.
